

# DURAPOL<sup>®</sup> 5870 Ultra Gloss

## DURAPOL<sup>®</sup> 5870 Ultra Gloss Moisture Cure Polyurethane

DURAPOL<sup>®</sup> 5870 is a 70% solids, single pack, clear, high gloss, moisture curing polyurethane for use on interior timber, parquetry and cork flooring. Due to its exceptionally high solids, DURAPOL 5870 Ultra Gloss enables a variety of coating systems to be applied in a single day.

**Economical /  
One Day  
System:**

Less than half the price per litre and double the solids of most waterbased floor coatings. One coat of DURAPOL 5870 will be equivalent to two coats of most water based floor coatings.

When applied in a two coat system over one of the recommended sealers, DURAPOL 5870 is lower cost than a traditional three coat system.

**High Solids:**

DURAPOL 5870 Ultra Gloss is 70% solids which enables a floor to be finished in one day (with the appropriate choice of sealer) or for a floor to be finished over two days with only two coats required. At the same application rate per square metre, two coats of DURAPOL 5870 will result in a higher film build than three coats of any 45% moisture cure polyurethane.

**Low VOC:**

Safer for the user, building occupants and the environment.

**Low Yellowing:**

Recommended for use on light or blonde timbers.
